

Empowering the Oil & Gas Sector with High-Quality, Reliable Solutions Made in Saudi Arabia

B2-Flex is a proud Saudi manufacturer and a leader in advanced industrial and environmental solutions. With over **30 years of expertise**, we provide high-quality products designed to enhance **efficiency, safety, and sustainability** for oil and gas operations throughout Saudi Arabia and the Middle East.

Our dedicated engineers have developed heavy-duty reusable bags and innovative spill solutions that improve operational efficiency, ensure compliance and safety in challenging oilfield environments. Our mission is to support industrial productivity through eco-friendly and durable solutions tailored to demanding oil and gas applications.

With a commitment to quality and innovation, every product we offer meets the highest standards of reliability and performance. Partner with us to experience the significant impact of our superior products and exceptional service. Choose B2-Flex for reliable solutions that drive success and sustainability – and elevate your oil & gas capabilities to new heights.

Designed for tough oilfield conditions, our solutions protect your team, your site, and the surrounding environment.

Eco friendly

Reusable and sustainable designs that contribute to environmental protection.

Safety Compliance

Meets all relevant safety standards.

Reliability

Durability and consistent performance.

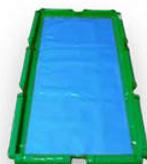

Efficiency

Designed for quick deployment and ease of use.

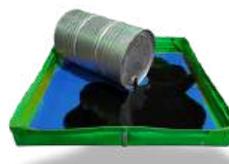

Heavy duty Reusable all-purpose jumbo bag

Durable bags built to withstand harsh field conditions. Designed for safely collecting and transporting oil, drilling fluids, sludge, and contaminated soil. Made from chemical-resistant materials for secure containment and easy handling.

Large-Scale Deployment Tray!

Heavy-duty, foldable containment trays designed for spill control during maintenance or fluid transfer operations. These trays help contain leaks and minimize environmental impact.

Spill Containment for the underneath

Reliable, foldable berms that provide immediate spill response capability. Ideal for oil storage areas, transportation hubs, and field operations where rapid deployment and liquid containment are critical.

Fold Down Side Mat

Lightweight, foldable mats engineered to prevent cross-contamination in field sites. Essential for cleaning and decontamination of tools, equipment, and personnel in remote oil & gas locations.
