

## Empowering the **Port** Sector with High-Quality, Reliable Solutions Made in Saudi Arabia

The Big Bag Company (**BBC**) is a proud Saudi manufacturer and a leading provider of industrial and environmental solutions, specializing in high-quality, durable, and sustainable products designed to optimize port operations across Saudi Arabia and the Middle East. We are dedicated to enhancing port operations by delivering innovative, high-performance products that ensure safety, efficiency, and durability in demanding maritime environments.

With **over 30 years** of experience, we understand the unique challenges faced by ports, including cargo handling, facility management, waste management, and spill containment. Our engineers have developed a specialized range of durable, heavy-duty reusable FIBC bags and advanced environmental protection products that enhance **operational efficiency, sustainability, safety, and compliance**.

*Designed for tough port conditions, our solutions protect your team, equipment, and the marine environment.*

### Eco friendly

Reusable and sustainable designs that contribute to environmental protection.

### Safety Compliance

Meets all relevant safety standards.

### Reliability

Durability and consistent performance.

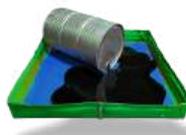

### Efficiency

Designed for quick deployment and ease of use.

**Heavy duty Reusable all-purpose jumbo bag**

Used for safe storage and transport of bulk materials at ports. Built to withstand harsh weather and marine conditions.

**Spill Containment Tray**

Quick-deploy tray designed to contain spills from drums and containers in port loading/unloading areas. Enhances hazardous liquid management.

**Large-Scale Deployment Tray!**

Flexible tray with liftable berms, perfect for equipment maintenance or containing materials during repair and clean-up operations at docks or port workshops.

**Fold Down Side Matt**

Compact and foldable mat with low berms for quick spill containment during maintenance or fueling. Easy to deploy and store—well-suited for port operations.

**Custom Equipment Covers**

Durable covers engineered to protect port machinery and equipment from dust, moisture, and salt exposure—extending equipment life and reducing downtime.
