

Heavy-Duty solutions for Agriculture Sector

B2 Flex is a proud Saudi manufacturer and a leading provider of engineered solutions for the agriculture and agri-infrastructure sector across the Middle East. We specialize in bespoke PVC-based systems designed to support critical farming operations, irrigation networks, crop protection needs, and agricultural infrastructure development.

Using advanced **high-frequency welding technology**, our industrial-grade fabric systems deliver exceptional mechanical strength, UV resistance, chemical stability, and long-term durability — ensuring reliable performance in harsh outdoor environments, from open-field farms to large-scale greenhouse and irrigation projects.

Our solutions are deployed across **farms, nurseries, greenhouses, irrigation facilities, livestock operations, and agricultural logistics hubs**, supporting efficient water management, safe chemical handling, environmental protection, and improved productivity.

Trusted by major industry leaders including **Aramco and SABIC**, B2 Flex provides high-quality, precision-engineered products that help farmers, agri-contractors, and agricultural developers enhance operational efficiency, reduce risks, and maintain compliance with environmental and agricultural standard

Why we stand out?

Eco-Friendly

Sustainable products that reduce carbon footprint

High Quality

Built with industrial-grade materials for durability, safety, and reliability in extreme conditions

Scalable Capacity

Modern facilities ready for both standard and high-volume production

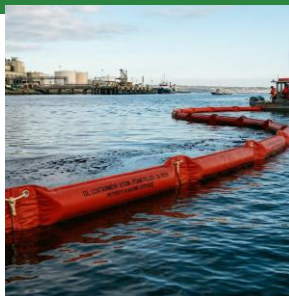

Compliance & Safety

ISO-certified and manufactured under strict quality controls

Heavy duty Reusable all-purpose jumbo

Engineered for agriculture, our jumbo bags offer outstanding durability and load capacity for secure handling of grains, fertilizers, feed, and other solid or semi-solid farm materials.

Oil Spill booms

Engineered for farm use, our booms combine high-buoyancy floats with a reinforced underwater skirt to prevent oil from migrating across irrigation systems or natural water bodies.

Flexible tanks for irrigation

Durable PVC flex-tanks designed to support modern irrigation and sustainable farm water management
